DETAILED ACTION

Response to Amendment

The Amendment, filed on November 11, 2009, has been entered and acknowledged by the Examiner. Claims 1, 5, 13-14, and 16 are pending in the instant application.

Allowable Subject Matter

Claims 1, 5, 13-14, and 16 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, specifically for the limitation of scattering-prevention member, which is a cylindrical sleeve whose both ends are open, for covering surrounding of the coil portion, said both open ends respectively facing the forward end and the rear end of the coil portion; a sleeve lead wire, which is attached to said scattering prevention member at one end and to said heater at the other end; and wherein in the electrode, the first lead wire portion is connected to a first lead-in wire and the second lead wire portion is connected to a second lead-in wire, said first and second lead-in wires being provided on two opposed ends of a glass tube in which a gas containing a light-emitting material is enclosed and to an interior of which fluorescent substance is coated in combination with other claimed features of the present claimed invention.

Regarding claims 5 and 16, claims 5 and 16 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 13, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 13, specifically for the limitation of an application step of applying an electron emission material to the heater in a condition where the heater is held by the connection-reinforcing member; a sleeve welding step of welding a sleeve lead wire to any one of the first and second connection members and inserting the heater into the inside of a scattering-prevention member, which is a cylindrical sleeve; a lead-in portion welding step of welding a first lead-in wire to the first connection member and a second lead-in wire to the second connection member; and a cutting step of cutting off the coupling portion from the connection-reinforcing member to separate the first and second connection members from each other in combination with other claimed features of the present claimed invention.

Regarding claim 14, claim 14 is allowable for the reasons given in claim 13 because of their dependency status from claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hara (US PUB 2006/0214581) is cited to show a discharge lamp and illumination apparatus.

Watanabe et al. (US PUB 2006/0214551) is cited to show a fluorescent lamp and method of manufacturing fluorescent lamp.

Imura (US PUB 2006/0113885) is cited to show a discharge fluorescent apparatus including fluorescent fibers.

Nagahara et al. (US PUB 2008/0157676) is cited to show a filament electrode and fluorescent lamp.
